Mini Project Answers

Questions	Answers/Links
1. List 4 finalist laptops.	1. Lenovo ThinkPad E16 Gen 2 2. Asus Vivobook S 15 OLED 3. Lenovo ThinkPad P15 Gen 2 4. Dell Precision 7550 (Refurbished)
5. Name the selected computer and mention its manufacturer, model, processor, GPU, RAM, and Form Factor.	● Selected computer: Lenovo ThinkPad E16 Gen 2 ● Manufacturer: Lenovo ● Model: ThinkPad E16 Gen 2 (21M5002DGE) ● Processor: AMD Ryzen 7 7535HS (6 cores, up to ~4.55 GHz) ● GPU: AMD Radeon 660M integrated graphics ● RAM: 32 GB DDR5 (4800 MHz) ● Form Factor: Notebook (16-inch laptop)
6. Provide a link to the selected computer. (It must be currently in the market, but can be sold out.)	Lenovo ThinkPad E16 Gen 2 Asus Vivobook S 15 OLED Lenovo ThinkPad P15 Gen 2 Dell Precision 7550 (Refurbished)

7. Justify your choice in 1-2 paragraphs explaining why it is the best option for John.	Lenovo ThinkPad E16 Gen 2 Considering performance, reliability, portability and cost, this one is the best for John being a computer science student where he may need to install and run different heavy software, development environments and even VM smoothly. This laptop is easy to carry (1.81 kg), has higher battery life (up to 15.4 h) and 32 GB DDR5 which ensures processing powers and stable performance without freezing. Lenovo ThinkPad E16 Gen 2 meets John's longevity requirement because of its strong hardware and reliable construction.
8. Include reasons for not selecting the other three laptops.	Asus Vivobook S 15 OLED This laptop has high configuration same as Lenovo ThinkPad E16 and uses OLED but it is used for multimedia and may not have same level of durability and reliability as Lenovo ThinkPad E16 Lenovo ThinkPad P15 Gen 2 It is heavier (~ 2.7 kg) and less portable. It has a shorter battery life (~5–7 hrs). It is refurbished. Dell Precision 7550 (Refurbished) This laptop is heavy (~2.5 kg) and less portable and possesses an older processor (6 cores) which is less helpful for a computer science student.
